Module Overview

- **Rotate**
- **Skew**
- **Scale**
- **Translate**
- **Summary**

Adding your own slant or angle to things

Rotate

Rotate

```
.tilt {
   transform:   rotate(15deg);
}
.upsideDown {
   transform:   rotate(180deg);
}
```

Altering the visual state of affairs

Skew

Skew

```css
.twisted {
   transform:   skew(30deg, 30deg);
}
.leanBackLeft {
   transform:   skewX(30deg);
}
.stretchUpRight {
   transform:   skewY(150deg);
}
```

Zoom!

Scale

Scale

```css
.miniMe {
   transform:   scale(0.5);
}
.twiceAsNice {
   transform:   scale(2);
}
.instantDiet {
   transform:   scaleX(0.75);
}
.suddenlyTaller {
   transform:   scaleY(1.25);
}
```

So you moved?

Translate

Translate

```css
.moveRight {
   transform:   translate(3em);
}
.toTheLeftToTheLeft {
   transform:   translate(-3em);
}
.downToTheRight {
   transform:   translate(3em, 3em);
}
.movinOnUp {
   transform:   translateY(-3em);
}
```
